

SOLONS ADVANCE SOCIAL CREDIT PLAN

House Plans To Adjourn Today: Back In 90 Days

After a day of sudden changes, the way was paved today for early adjournment of the Alberta legislature to complete its plans for a Social Credit program. An interim supply bill, calling for a sum of \$5,500,000, was introduced and given first and second reading and the house adjourned, shortly before 6:30 p.m.

To three p.m. today.

The adjournment of the legislature may come by the end of the week, it was indicated, after the house has dealt with various Social Credit measures.

A government bill for the ap-

pointment of commissioners of per- to administer a Social Credit program was introduced by Pre-

dictor Aberhart, who gave it first reading Tuesday.

It was said to meet the require- ments of the interim supply of Social Crediters, who it was re- ported, had agreed to adjournment of the house.

The bill dealing with the

Social Credit members tem- porarily became inactive dur- ing the adjournment.

Insurgents Won't Oppose Third Reading of Supply Measure

White Social Credit members

were present in the house when they

passed the interim supply bill through first and second readings.

The fire-up in the camp has not entirely subsided.

"We are presenting an air of alertness," said one mem- ber of the insurgent group.

The insurgents, however, have decided to remain inactive until after the interim supply bill has been ratified. The supply bill was passed in caucus on Wednesday morning.

NOT TO OPPOSE

Having agreed unanimously on the supply bill, passing it through two successive stages they do not propose to oppose it now.

In addition, with the govern- ment's fiscal year ending on Wed-nesday, March 31, the budget debate on Thursday, they do not want to take the responsibility of having to go up again.

Through third and final reading, together, with assent by His Excellency, Lieutenant-Governor J. C. Bowen, are expected to be given on Wednesday.

NOT ENTIRELY PACIFIED

But the insurgents are not com- pletely pacified. Some have indicated there will be a non- confidence motion moved against the government before the house adjourns on its long recess.

There are some members of the group who do not entirely oppose third reading of the interim supply bill, but it is believed they will allow the bill to pass without opposition at such time as this bill will be brought up again. They have no confidence in the government and have a show-down.

MILITARY SERVICES

The insurgents believe that by allowing the three months' supply to go through, they can take that time to marshal their forces for further action. Their plan is to have the whole nation actuated when the government does not call, if the government does not meet their Social Credit and debt settlement plan.

ITALY IS FORCING ETHIOPIA TRADE

By GEORGE HAMILTON Canadian Press Writer

LONDON, March 31—Italy is na- tionalizing trade in Ethiopia. Unfor- tunately, the country is controlled by the Italian government of the British firm of Mohammed Alli. Alli runs a general store business throughout the country, with a large store in Addis Ababa with branches at other points in Ethiopia.

Through its consulates in Addis Ababa and Rome, the British government has been representations to the Italian government to close down the Italian government of the British firm of Mohammed Alli. Alli runs a general store business throughout the country, with a large store in Addis Ababa with branches at other points in Ethiopia.

The insurgents believe that by allowing the three months' supply to go through, they can take that time to marshal their forces for further action. Their plan is to have the whole nation actuated when the government does not call, if the government does not meet their Social Credit and debt settlement plan.

BOY FREED BY KIDNAP THUGS

EL PASO, Tex., March 31—Robert M. Miller, missing Safford, Ariz., Boy Scout executive, was pulled into the El Paso Natural Gas Com- pany control station north of here early today. He had been freed by kidnappers last night.

Paderewski, III., Motors To Bier Of Old Composer

LAUSANNE, Switzerland, March 31—Ignace Paderewski, son of the famous Polish pianist, has been born to-day from his wife in Montreux, motorized here to-day from his wife in Montreux, motorized here to-day from his wife in Montreux, to lay a wreath on the bier of his old friend, Karel Sennayn, Polish composer.

The "boy-old" Paderewski de- fied advice of friends who feared it might affect a nervous breakdown.

Great Dame Winner

TORONTO, March 31—The Can- dian Kennel Club has announced the Great Dane, Señor Savagold, owned by Mrs. W. T. Hyson, Brookville, was awarded the "best in show" prize at the kennel club's

annual show.

Compressed Gas Banned By Nazis

BIRMINGHAM, England—Com- pressed gas cylinders, which had been banned under a decree announced last night. Special permission must be obtained for exemption from the decree.

WINDSOR TO GO TO FRANCE SOON

SAINTE WOLFGANG, Austria, March 31—The Duke of Windsor has decided definitely to go on vacation a month, it was indicated.

A police inspector took photographs of the Duke and his wife as they left for the airport and will permit taking of pictures now but will restrict photographers to April and April before his departure for France.

Great Dane Wins

TORONTO, March 31—The Can- dian Kennel Club has announced the Great Dane, Señor Savagold, owned by Mrs. W. T. Hyson, Brookville, was awarded the "best in show" prize at the kennel club's

annual show.

WEDNESDAY, MARCH 31

BUSINESS GOES ON

The public, as well as those who have invested money in the railways and those who work for them, are anxious to congratulate themselves because the time when the financial health of the railways is not to occur. In securing a peaceful settlement, the railway management and employees decided to allow the business of the country to proceed, since to paralyze the railways would half traffic and trade clear across the Dominion.

Canadians, fortunately, have only their imaginations to tell them what a real railway strike would mean to them. They have not gone through the experience of the certain inaccuracy of the losses are obviously enough that experience is not necessary to evoke a genuine and general sense of relief that the damage has passed.

THE BOARDS SET THE SALARIES

Alberta teachers at their convention this week voted to accept a reduction of 10 per cent to teach school for less than the pay prescribed by law. What about the Department of Education disciplining schools which compel or induce teachers to work at cut rates?

The unfortunate teacher may be in a position where he or she must take a job which can be found, at whatever salary he can get. To throw a teacher out of work, or fine him—or her—because necessity compels the acceptance of a job which is not worth the pay is a queer way to go about the righting of the matter.

The law setting a minimum rate of pay for teachers was passed for the regulation of school boards—not teachers. If the Government cannot enforce it against the school boards, then the law is dead letter and the responsibility for the non-enforcement should not be thrust upon the teachers.

THE LOST LEGION

Mussolini's army on the Madrid front seems to have got lost. Under circumstances which suggest that they were captured, or perhaps about is to the speed with which it advanced to the rear when the fighting grew warm.

Whatever II Duce may think about it, a display of good sense on the part of the Italian Legionaries after the fall of their war.

Their country is not being invaded, nor threatened, and has nothing to gain from their sacrifice. No doubt they are paid for their services, but there is no use to dead men.

In the same way, far enough, that neither the Spaniards nor Mussolini can catch them will they be doubly lucky. That, quite conceivably, is what they would like to do. Playing master in these days of machine guns and bombs can be a dangerous game, but best, and getting shot for the glory of Benito wouldn't seem to add much to the inducements.

EDMONTON'S CORONATION CEREMONIES

Dynasties have fallen and monarchies passed away since 1815. British sovereigns were crowned. But the change in the broad sense of weakening of the attachment of Britons everywhere to the throne which is the cornerstone of their Empire.

On March 12 Edmonton will share with the rest of the Empire the privilege of proving that this miracle of loyalty still flourishes. Cheering crowds in London will acclaim the glorious procession to the coronation which epitomizes in its sweep and grandeur the imperial grandeur of Britain.

At the same time, the same of the same poignant patriotism, an entire commonwealth will pledge itself anew to the crown, that precious link which holds the Dominions in unity.

No effort should be omitted that may permit Edmonton aptly to meet the challenge of this auspicious event. The committee seeking to make the local coronation ceremonies worthy of the day they commemorate should be given every support by all citizens. In its work there can be too many helping hands, and the results of its labours should be a sacrament of loyalty as well as a pageant of empire.

THE RECORD OF FAILURES

Montreal, on Monday, made its first record of departed hopes of bringing in the "new economic order," including the lately deceased but nowhere lamented universal licensing bill. Naturally the royal look took something of the nature of a valedictory oration.

The address was interesting and informative,

if not very cheerful, as showing the every attempt to introduce what the Ministers thought was Social Credit broke down, usually because of an amendment or objection, with the party rather than from the opposition. If this does not accord very well with what has been said on other occasions as to why the plans were abortive, it has the advantage of being only a trifle more cheerful.

From the prosperity certificates to the licensing bill the way is strewn with the wrecks of projects which collapsed from their own weight. What is the conclusion? That these were both Social Credit measures, necessary, if there could be a system preliminary to it, then Social Credit is not adaptable to the conditions, habits and temperament of the people of Alberta, nor of even the members of the Social Credit party. That may not be the fact; but it is the conclusion to which this record of successive failures leads.

CALL THE MAJOR?

Through the smoke of battle the fact finally emerges that what the Loyalists and the Iaurensians on the Left are doing and fighting for is the Security Tax proposal. The Loyalists are right. But both are emphatic in declaring they want Social Credit, and equally emphatic in declaring the know how to bring it into effect.

To the Loyalists it seems rather plain that one group or the other is wrong. They cannot both be right. And neither will admit the other is or may be right. Then why not call in an authority who is not involved in either? The Securities Tax idea is the real Social Credit or only another substitute?

It is impossible to be too particular in such matters, for there seem to be many brands of Social Credit placed on the market by the propagandists outside. And, while Albertans are in the experimental mood, we really can't try all the schemes offering and find out which one is workable—if any—a system of cut-and-try?

Life is short for that, and everybody else is racing to break in the process. Besides, there is another election due in three years and a half, and if the dividends are not going out regularly by then, it will be time to bring in the Major.

All eyes seem to point in one direction—that of Major Douglas. The Major has been accused of doing some neat foot-work when he was asked to come along and try to make his ideas work. He must be right. The Securities Tax scheme will come up with them if he won't. Why not, when all else fails, as it seems likely to do, in call the Major and ask him what he thinks about the Securities Tax?

Arthritis

By DOCTOR FRANK MCCOY

In the human family, we find a great number of people who have a leaning toward the development of some kind of rheumatic disorder. Just as there are some who have a tendency toward tuberculosis, and others toward syphilis, so there are those who have the rheumatic tendency who have some genetic tendency. Why? Some grow such genetically sound and others not so sound. This is not fully understood, but has not been adequately explained as yet; however doctors recognize that such special disorders do develop.

In one in whom the rheumatic disease is present, we may find an outbreak of muscular rheumatism, gout, rheumatic fever or arthritis. These are the main forms of arthritis, but there is also a form that is rheumatic toxaemia. It is interesting to note that many prominent medical authorities of today are coming to the point of view that arthritis represents a disease of the whole body.

In other words, the fundamental rheumatic toxemia which is responsible for arthritis makes the whole body toxic and when these toxins irritate the joints, we have arthritis. Furthermore, the joints are the chief organs involved in the removal of the primary disease. We local treatments given to the sore joints may make the patient more comfortable and may ease his pain, they do not bring lasting relief because they ignore the cause. The disease must always be fought in this toxic state of the body.

It is important to realize that the primary cause is not the joint, but the body as a whole, and that the joints are secondary to the body.

As in considering how the rheumatic toxemia is produced, it is necessary to study the intestinal tract. Abnormal intestinal conditions such as fermentation of sugars and starches; the presence of mucus, kinks and adhesions, with their resultant constipation, are factors in the production of the disease.

The toxemia of the arthritis appears to be increased if the attempt to use much sugar or starch in the diet inasmuch as the rheumatic patient does not metabolize these foods efficiently with the result that injurious metabolic products are formed.

There is a marked increase in the amount of mucus given off as a controlling condition in those who drink beer, coffee, tea, etc., which deprives the intestines of the energy they need to do their work normally—any of these may help to produce that particular and definite kind of mild-toxicity from which rheumatic troubles come.

The toxemia of the arthritis appears to be increased if the attempt to use much sugar or starch in the diet inasmuch as the rheumatic patient does not metabolize these foods efficiently with the result that injurious metabolic products are formed.

There is a marked increase in the amount of mucus given off as a controlling condition in those who drink beer, coffee, tea, etc., which deprives the intestines of the energy they need to do their work normally—any of these may help to produce that particular and definite kind of mild-toxicity from which rheumatic troubles come.

BOWEN PERFORMS FIRST OFFICIAL ACT OF OFFICE

Mr. Horace J. Goy, J. Bowen, public attorney, performed his first public official function since taking office. He appeared and presided over the trials, third reading of which had been given Monday.

His Honor, accompanied by Sergeant S. Newby, entered a secondary door of the chamber, accompanied by Hon. J. W. Hugget, K.C., attorney general; Mr. A. Anderson, clerk of the legislative service.

Proceeding direct to the Speaker's throne, he was asked by Mr. Andrew if he intended to sit on the bills. He did so and immediately left the chamber.

The most important of the bills was that dealing with arrangements for the provision of seed grain relief.

As a result of this assent, the provincial government can now go about its task of making arrangements with the Dominion, the banks, the municipalities and others for the issuance of necessary funds.

Revised Trade Part Brother To Original

OTTAWA, March 31.—The revised trade agreement with the United States has been accepted in the opinion of Senator Hart Dandurand, who has based his bill on the agreement received from the Senate. The bill, which was introduced last night, will permit "give and take" experiments with the Dominion, the banks, the municipalities and others for the issuance of necessary funds.

Sen. Arthur Meighen, Conservative leader, said the changes ironed out in the bill were so minor that the original agreement was practically a "photograph" of the original.

Medicine Hat Votes \$900 For Crowning

MEDICINE HAT, March 31.—Final arrangements for the financing of the city's coronation celebration have been completed by the city council. The program is expected to include street planting, religious services, street净化, a procession of 3,000 coronation medallions to be distributed, singing and dancing. There will be street dancing in the evening. A vote of \$900 was adopted.

Swordfishes

ONCE WENT BY THE SCIENTIFIC NAME OF "XIPHIAS GLADIUS," AND ENGLISH COMMON NAME "VENTRAL BUS NULUS," MEANING "SWORD SNUB, TIP POINTED, VENTRAL FIN ABSENT."

The scientific name of the swordfish is Xiphias gladius, Greek and Latin for "sword," which is quite simple after the long name given above. In early days, the specific name attempted to describe the animal in Latin words.

NEXT: Does science understand the sense of direction displayed by birds?

The Cream of All Cartoonists

BEST IN THE WEST

HER NAME IN LIGHTS

BEGIN HERE TODAY
DAPHNE BRETT loved LARRY HERZBERG, architect. But Daphne had not accumulated sufficient money to support him, so she left, her younger sister, on a career.

Then Daphne went on a two-months' trip. Her father, Larry again asks her to marry him. But she says no, she loves him why. So Larry says goodbye, assuming she's still a virgin, as the fiery type. But I thought that Herzberg agreed to you?"

"He's a bit of a wise guy," says Larry again. "I'll give him a new girl. But Daphne is still a virgin, after all. Finally I'm really inviting him to have tea with her again."

NOW GO ON WITH THE STORY

CHAPTER XXIII
DAPHNE blinked until her eyes were open and rubbed deeper under the covers. She fell numb with lack of sleep. "What time is it?" she asked sleepily.

Jennifer threw a comb, brush and silver hair clip into the open case. "Almost 11," she said. "We have to leave now and I haven't had any breakfast. Do we have time to get some coffee and toast?"

Daphne started to rise and threw back the covers. Her feet fumbled and found her slippers. She lay back again. "I must have been a bit when we left the Hammers. Where did you go?"

"I took a train to the 3 o'clock train so Douglas and I went to the station with him. Then we went to the theatre. You will try and hurry that, Daph."

Daphne put some bread in the food warmer. "I think it was a good party, wasn't it?"

Jennifer tucked her hair under her hat, readying herself all the time for you. What were you and Herzberg doing so late yesterday?"

"Wah-hah-hah," Daphne snorted. "This is no time to ask me. I'm too tired. Come on, Jennifer. What time are you getting back tomorrow?"

"I'm not returning until Monday. I'm driving back with Grace. Daphne, last night did you talk to Mrs. Hammers about my getting the part of Louise?"

"Louise?"

"Of course, Louise! Wake up, Daphne and don't act so dumb. You know I told you all about it."

Sonnysayings

By Fanny Y. Cory

Gh, Baby! Don't ya know dodos don't mean nuffin'? It's love that counts!
